

Fast Track Ethics Approval

- You should also note that there is a Fast Track Ethics Approval form which can be accessed from this web-site. This form cannot be used for any project involving an LREC and should principally be used for identifying whether there are any significant ethical issues which have not been identified and as guidance to this effect. This form should be completed by researchers with their supervisors/research steering group to ensure that there is clarity as regards the need or otherwise to complete the full University Ethical Approval form. You are advised that adopting the Fast Track process should be taken with great care. The forms should be forwarded for scrutiny by the Chair of the Faculty Ethics Panel and will be notified to the Ethics Panel. It should be noted that there can be serious repercussions for researchers where a project fails to comply with effective ethical scrutiny. Researchers will receive written confirmation from the Ethics Panel advising them that they can proceed with their project.
