

Quick Guide – Print attachments from iPhone and iPad

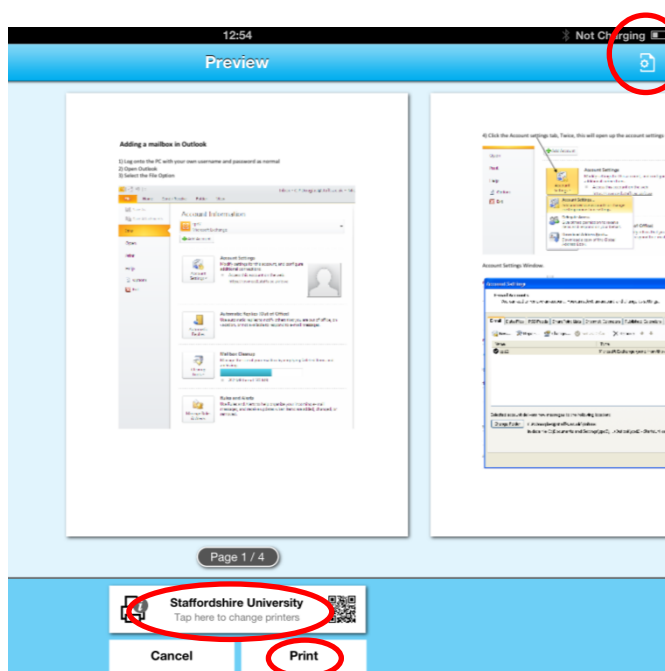

From the 'Mail' app you can print email attachments.

Open the email with the attachment and download the attachment if it has not already fully downloaded.

Press and hold on the attachment icon to get the print option to appear.

Press the Open in PrinterOn button, a preview screen will be displayed.

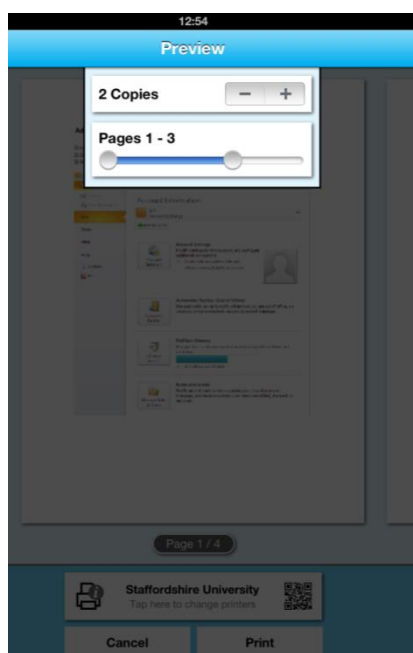

On this screen there is an option button in the top right hand corner that allow you to set number of copies and select which pages to print

Press  if you want to change the number of copies or select pages to print

Press 'Print' if you want to print to the Printer shown

If you want to select a different printer, tap where it says 'Tap here to change printers'

This is the screen that is displayed if you click the option to change number of copies or select pages to print
