

Conditions in Fundamentals in GPN Funded Places

Individual Criteria:

- It is the individual's responsibility to commit to attending the course and completing the necessary work in line with course outline (attendance at least 80%). Be open and honest and communicate as needed with the University staff if more assistance or support is needed.
- Commitment to engage with the academic content and formative assignments
- Commitment to attend each session from 9am – 5pm.

Support from Practice:

- Practices support the practice nurse by giving them the adequate time to attend the course as experience has shown that this has an effort on attrition (e.g. the practice nurse should not be using their own annual leave to attend the course)
- Have support from a mentor (experience of 2 years minimum) with the relevant qualification and provision of time for supervised practice.

Disclaimer:

- Health Education West Midlands reserves the right to charge the individual (or practice) for the course place if the individual discards their £3400 fully funded place (except in exceptional cases)
